Circular 130 & A-11  
Clinger-Cohen

U.S. AIR FORCE

# Executive Directive

## Presidential Memo on the Importance of E-Government, 10-Jul-02

***“My administration’s vision for Government reform is guided by three principles. Government should be citizen-centered, results-oriented, and market-based. These principles have been woven into the five Government-wide reform goals outlined in my Administration’s Management Agenda: strategic management of human capital, budget and performance integration, competitive sourcing, expanded use of the internet and computer resources to provide Government services (Electronic-Government or E-Government), and improved financial management. Effective implementation of E-Government is important in making Government more responsive and cost effective.....”***

**George W. Bush**

## FEA Federal Enterprise Architecture

The FEA is a business and performance-based framework to support cross-agency collaboration, transformation, and government-wide improvement. It provides OMB and the Federal agencies with a new way of describing, analyzing, and improving the Federal Government and its ability to serve the citizen.

### ***DoD Definition of Enterprise Architecture:***

"The fundamental organization of a system embodied in its components, their relationship to each other and to the environment, and the principles guiding its design and evolution."

U.S. AIR FORCE

# Business Management Modernization Program

**BEA**  
**Business Enterprise**  
**Architecture**  
**(OSD BMMP)**

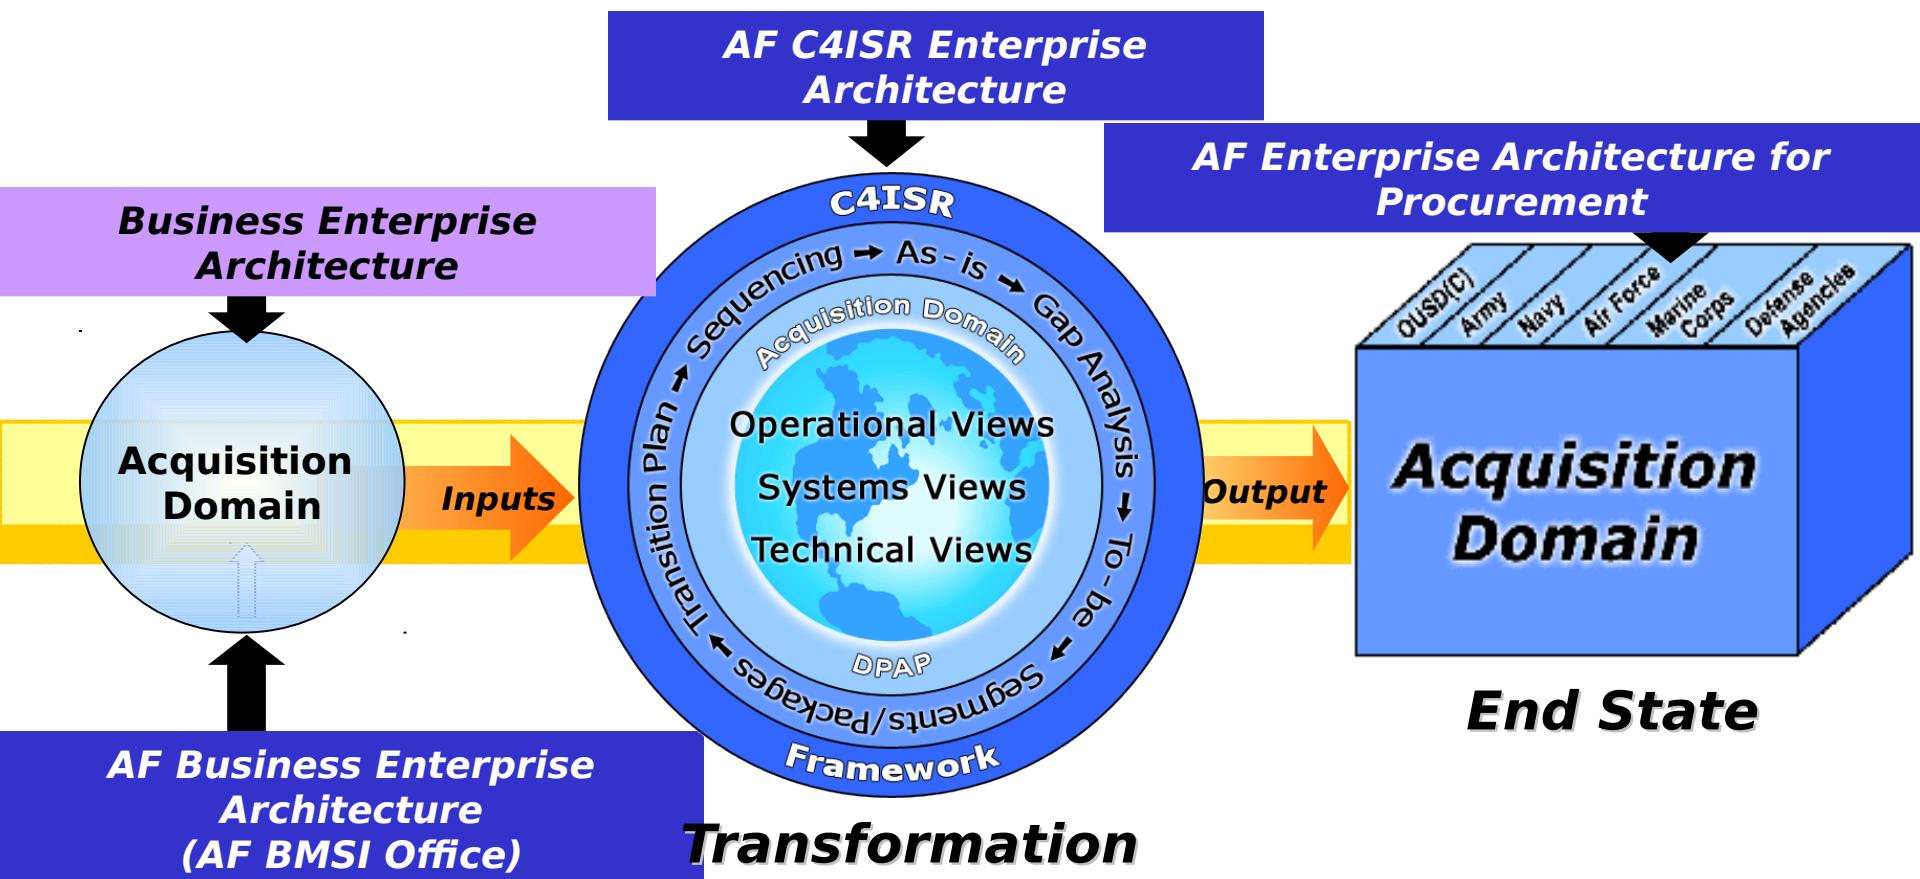

The Department of Defense's (DoD) Business Enterprise Architecture (BEA) is a high-level blueprint to guide the transformation of DoD. It demonstrates the design and development of business capabilities by linking business needs to business capabilities and tracing business strategies to systems solutions.

The AF BMSI Office provides policy, direction, and integration for AF business enterprise solutions and serves as the focal point for business management modernization to all external organizations.

# Building the Air Force Enterprise

**Different Initiatives . . .  
Different Audiences . . . But  
Shared Objectives**

U.S. AIR FORCE

# An Architecture has Multiple Views

A view represents the whole system from a particular viewpoint

Reduces perceived complexity **Plumbing Perspective** through separation of concerns

**Family Usage  
(Operational)**

**Plumbing View  
(System)**

**Plumbing Code  
(Technical)**

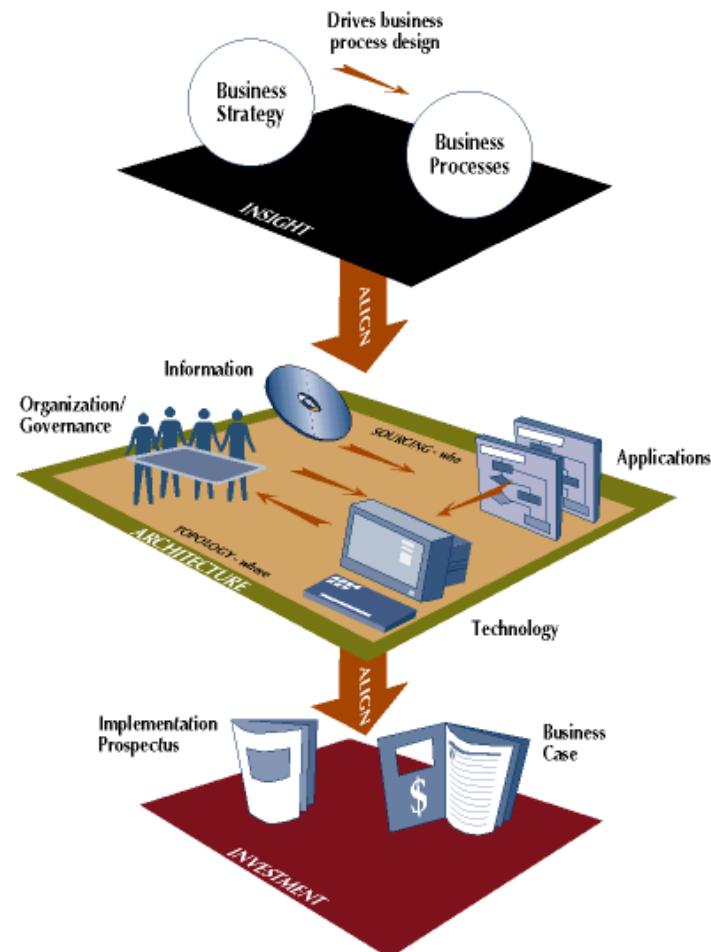

# Enterprise Architecture for Procurement with Commodity Councils

U.S. AIR FORCE

## Develop Enterprise Architecture

- Operational Architecture (OA)
  - Policy (Constraints / Requirements)
  - Processes (Organization)
  - People (Resources)
- Systems Architecture (SA)
  - Mapping of Systems to OA
  - Enabling Technology
  - COTS and Legacy
  - Data Layer
- Technical Architecture
  - Federal Enterprise Architecture Standard
  - DoD Enterprise Architecture Standard
  - Air Force JTA Standard
- Transition Plan (TP)
  - Courses of Action (COAs)
  - Implementation Governance

Completed

In Process

# Enterprise Architecture for Procurement with Commodity Councils

**Commodity Council** = cross-functional sourcing team

Technology Enabled Execution

Business Intelligence

Leveraged Buying

Commodity Council

Collaborative Commerce

Corporate Level Strategy

Characteristics: Executive-level endorsement

Commodity = segmented goods or services.  
Does not imply an expendable or non-complex item category of expendable or non-complex items

Centralized Strategy ...decentralized execution

**U.S. AIR FORCE**

# Back Up Slides

U.S. AIR FORCE

# DoD Approach

- The vision is realized through the development of an *enterprise architecture*, a list of business, technical and systems requirements that create a “blueprint” for building and connecting new and existing processes and systems
- End-to-end *business scenarios* have been designed to provide functional business process validation
- A *transition plan* lays out the key high level tasks which must be accomplished to implement the architecture
- Activities, business rules and requirements in the architecture have been grouped by business area, or *domain*
- Domain leaders will lead the *transformation* and coordinate the implementation of changes consistent with the architecture in partnership with BMSI and in accordance with the established governance model

# What's Different?
